

Modular column protection h439_22

Modular polyethylene protection for columns from 200 to 700 mm, yellow, for indoor and outdoor use. Height 1000 mm.

The **modular column protection h439_22** is the ideal solution for securing columns and load-bearing structures in both **industrial** and **commercial** environments, both **indoors** and **outdoors**. Made entirely of **durable polyethylene**, this protection is designed to absorb accidental impacts caused by carts, forklifts, or other handling equipment.

In **high-visibility yellow**, it ensures clear signaling of sensitive points, reducing the risk of accidents. Thanks to its **modular structure**, it is perfectly adaptable to columns ranging from **200 mm to 700 mm**. The **pre-marked cutting guides** allow for easy custom fitting without the use of complex equipment.

Installation is **quick and intuitive**: the bars are inserted directly into the terminal posts by screwing, without the need for additional fastening materials. The product is supplied **disassembled** to facilitate transport and on-site assembly.

Perfect for warehouses, logistics centers, supermarkets, and loading/unloading areas, this protection ensures the safeguarding of columns and infrastructures, extending their lifespan and reducing maintenance costs.

Make your workplace safer with the h439_22 modular protection. Order today or request a personalized quote for large supplies!

Technical characteristics:

- **Material:** Durable polyethylene
- **Color:** Yellow
- **Shape:** Rectangular
- **Height:** 1000 mm
- **Maximum width:** 765 mm
- **Depth:** 200 mm
- **Net weight:** 6.39 kg
- **Gross weight:** 8.15 kg
- **Field of application:** Indoor and outdoor
- **Column compatibility:** From 200 mm to 700 mm
- **Additional features:** Custom cutting thanks to pre-marked signs
- **Mounting:** Screwing of the bars into the terminal posts (without fastening materials included)
- **Supply:** Disassembled
- **Warranty:** 1 year

User benefits:

- **Protection:** effective for columns from accidental impacts.
- **High visibility:** for the safety of pathways.
- **Installation:** quick without special equipment.
- **Usable:** in indoor and outdoor environments.
- **Structure:** modular and custom adaptable.

FAQ:

1. **Which columns can this structure protect?**

It is designed for columns from 200 to 700 mm in width.

2. **Is it also suitable for outdoor use?**

Yes, the polyethylene material is weather-resistant.

3. **How is it mounted?**

The bars are screwed to the terminal posts, without the need for additional fastenings.

4. **Is it possible to cut it to size?**

Yes, it is already pre-marked for easy and customized cutting.

5. **Is specialized personnel needed for installation?**

No, assembly is simple and can also be carried out by non-specialized personnel.

Mini buying guide:

When it comes to protecting pillars, columns, or load-bearing structures in industrial, logistical, or commercial environments, a **modular polyethylene protection** represents one of the most versatile, safe, and durable solutions on the market.

This type of protection is particularly useful in warehouses, production plants, covered parking lots, or loading and unloading areas, where pillars and columns are often exposed to accidental impacts from forklifts, pallet jacks, or company vehicles.

The h439_22 model offers **maximum adaptability** thanks to the possibility of being **cut to size** for columns with diameters from 200 to 700 mm, thus satisfying various structural protection needs. The **pre-marked cutting signs** facilitate the customization operation without having to resort to specialized tools or skilled labor.

The **polyethylene material** is resistant to impacts, weather agents, and corrosion, making the product ideal for both **indoor** and **outdoor environments**, ensuring a long life without the need for extraordinary maintenance.

The **mounting is quick and intuitive**: the modules screw together without the need for complex fixings or floor anchoring materials. The possibility of disassembling and reassembling the protection makes it perfect for those who want a temporary or easily repositionable solution.

Opting for a modular protection like this means not only preventing costly damage to structures but also **increasing the safety of people and vehicles** operating daily near columns.
