

Modular double-column hospital cupboard h823_13

Modular double-column cupboard with code lock. With ISO containers. Single column dim.: 600 x 400 x H 180 cm.

The **modular double-column cupboard h823_13** is an advanced solution for the storage and management of medicines in healthcare and hospital settings. Made with a **sturdy steel structure**, the cabinet is designed to withstand intensive use and the action of aggressive disinfectant products typical of operating theaters and critical wards. The double-column configuration maximizes storage capacity in an optimized footprint, solving the problem of medical supply organization through the integration of **ISO containers**. The **rolling shutter door** closure and **code lock** guarantee secure access management, preventing unauthorized removal of sensitive drugs.

Technical features

- **Single column dimensions:** 600 x 400 x h. 180 cm
- **Structure material:** disinfectant-resistant steel
- **Configuration:** modular double column
- **Closure:** space-saving rolling shutter door
- **Security:** electronic code lock
