

Modular floating platform 2x2 m h759_01

Floating platform ideal for various uses. Modular system consisting of HDPE floats. Total dimensions: 2 x 2 m. Available in different color variants.

Modular floating jetty ideal as a **play or sunbathing platform, mooring jetty for boats, movable jetty on rivers and canals** but also as a convenient **landing structure for helicopters on the water**. It features a **modular structure with total dimensions of 2 x 2 m**, which can also be ordered in different sizes upon request and subject to a quote. The floats, thanks to their small size, are easy to transport, move and assemble. The floating jetty is made of **high-density polyethylene (HDPE)**, **resistant and versatile**, and can be **installed even in open sea**. **Non-slip surface. Stainless steel ladder and 2 stainless steel anchoring kits/eyebolts included**. The system must be anchored to the seabed using an anchor or dead weight (not included), duly connected to the floating system using a rope or chain (not included) to be joined to a specific **anchoring hook** (included).

Technical features:

- Total dimensions: 2 x 2 m
- Modular system
- Construction material: high-density polyethylene (HDPE)
- 100% recyclable
- Material resistant to atmospheric agents and UV rays
- Stainless steel ladder
- 2 stainless steel anchoring kits/eyebolts
- Floating capacity: 350 kg per sqm single layer
- Tested system for installations in open sea, nearshore, lakes and rivers, up to 150cm wave (depending on anchoring)
- Quick and easy cleaning
- Low maintenance
- Resistant to temperatures from -55° to +75° without undergoing alterations
- Free of sharp edges
- TUV certification for maximum floating capacity
- Product available in different color variants

**Upon request and subject to a quote, it is possible to request the platform in different sizes.*
