

Modular playground station for outdoor areas h735_19

Colorful and fun playground station for outdoor areas of schools and playrooms. 2 slide-ladders, 1 playhouse, 1 tunnel and 1 cube.

The **brightly colored play station** is perfect for school courtyards of kindergartens, schools or public parks. Thanks to the presence of different components, the playground station is a versatile solution and ideal for combining motor development and stimulating the imagination and creativity of the little ones. The **modular structure** consists of **2 reversible slide-ladders, 1 playhouse, 1 tunnel, 1 cube and 1 cap**. The cube and the playhouse are created by assembling **square and triangular panels** of various colors. The slide-ladders are reversible as they can be mounted as a ladder or as a slide depending on needs. All elements are made of **high-resistance plastic material**. The station **does not require tools for assembly** and is equipped with **UNI EN 1176-1/3 certification**.

Technical features:

- Dimensions: 250 x 380 x h. 125 cm
- Playground station made of high-resistance plastic material
- 11 panels
- 1 tunnel
- 2 reversible slides/ladders
- 4 triangular panels
