

Modular road barrier h661_03

Modular polyethylene road barrier. Dimensions: W.195 x D.44 x H.100 cm.

High-density **polyethylene barrier**, versatile and suitable for solving various safety situations in temporary construction sites, for delimiting pedestrian passage, traffic control, or pedestrians during events. Durable and robust, the barrier is provided complete with feet, which make it stable even on uneven ground. Wear-resistant, equipped with an integrated male-female connection system, making rapid modular coupling between multiple elements possible without the need for additional accessories. Made in **orange color**.

Technical features:

- Material: polyethylene
- With feet
- Modular
- Dimensions: W.195 x D.44 x H.100 cm
- Color: orange
