

Modular school table h872_19

Modular school table for 5 students in melamine chipboard and steel, compliant with UNE-EN 1729-1 standard for children over 12 years old.

This **modular table** has been specifically designed for school classrooms and educational spaces requiring high standards of resistance and passive safety. Thanks to its configuration, it allows for the efficient organization of study groups, offering a durable work surface capable of withstanding the stresses typical of **intensive use**. The top is made of materials that guarantee structural unchangeability even in the presence of humidity or thermal changes, making it a long-term investment for schools and training centers.

Technical features

- **Tabletop material:** 18 mm chipboard with high-resistance melamine finish against water, wear, and heat.
- **Edge protection:** injected PVC profile with a rounded shape to minimize the risks of accidental impact.
- **Supporting structure:** metal tubular frame finished with epoxy paint, 5-leg configuration for superior stability.
- **Usage capacity:** designed to accommodate 5 students simultaneously.
- **Support system:** non-slip, noise-reducing, and scratch-resistant rubber feet, equipped with micrometric adjustment for uneven surfaces.
- **Regulatory compliance:** certified according to the UNE-EN 1729-1 standard, size 6.
- **User target:** suitable for students aged 12 and up, with a height between 159 and 188 cm.
- **Color variant:** green finish.
