

Modular sectional play structure for outdoor spaces h735_27

Colorful modular play station including slides, ladders and high-resistance plastic panels.

The **outdoor play station** for schools and gyms, playgrounds and playrooms, is **easily assembled** thanks to the modular sectional elements made of **high-resistance plastic**. **Reliability and safety** guaranteed to allow recreational activities and children's play in total serenity. The structure consists of **14 panels, 2 ladder panels, 2 tunnels, 1 large slide, 1 large ladder, 2 safety railings, 4 triangles, 2 reversible slide/ladders** and **1 cap**. By assembling all the elements, you will create a play station through which children can have fun and fantasize, imagining games where they themselves will be the protagonists.

Technical characteristics:

- Dimensions: 400 x 420 x h. 140 cm
- High-resistance plastic material
- Colors do not fade and are resistant to UV rays and atmospheric agents
- 14 panels
- 2 ladder panels
- 2 tunnels
- 1 large slide
- 1 large ladder
- 2 safety railings
- 4 triangles
- 2 reversible slide/ladders
- 1 cap
- The structure is sectional and modular
- Compliant with standard and UNI EN 1176-1/3 certified
