

Monobloc office cabinet h471_69

Monobloc steel sheet cabinet 600x400x1000 mm, with adjustable shelf and 180° door, ideal for secure archiving in offices and studios.

The **painted sheet metal cabinet** represents a compact and functional solution for organizing documents and materials in professional environments, offices, and technical studios. The structure is entirely made of **cold-rolled steel sheet**, which gives the module high mechanical stability and resistance to daily stress. The surface finish is obtained through painting with **epoxy-polyester powders** in RAL 7038 grey, ensuring protection against corrosion and ease of cleaning.

The design is optimized for operation: the door is equipped with an internal hinge with a pin that allows for **full 180° rotation**, eliminating frontal obstructions during loading and unloading operations. Internal space management is handled by a movable shelf, configurable in height to adapt to binders, folders, or equipment of various sizes.

Technical features

- **Material:** Cold-rolled steel sheet
- **Configuration:** 1 hinged door with 180° opening
- **Internal equipment:** 1 height-adjustable shelf
- **Finish:** Epoxy-polyester powder coating
- **Color:** Grey RAL 7038
- **Locking system:** Key lock with lever closure
- **External dimensions:** W 600 x D 400 x H 1000 mm
- **Operating weight:** 19 kg
