

Mortuary stretcher h566_10

Body transport stretcher in stainless steel, continuous surface without drainage hole, fixed height. Dimensions 207x90x79 cm.

The body transport stretcher is a specialized device designed for the safe and dignified transfer of deceased individuals between different environments, both in hospital settings and funeral facilities. The **stainless steel** structure guarantees durability over time and ease of sanitization, essential features in critical environments where hygiene and sterility are a priority. The **continuous surface without a drainage hole** maintains the integrity of the surface, preventing seepage and ensuring a stable and uniform base. The absence of a cover allows for easy loading and unloading, while the **fixed height** ensures an ergonomic and standardized position.

Technical features

- **Material:** stainless steel
- **Surface:** continuous, without drainage hole
- **Cover:** absent
- **Height:** fixed
- **Dimensions:** length 207 cm, depth 90 cm, height 79 cm
