

## Motorcycle-shaped spring rider h521\_47

Individual motorcycle-shaped spring rider for public parks, with weather-resistant HDPE silhouette. Dimensions: L. 1100 x D. 300 mm. Recommended age: from 3 years.

The **h521\_47 spring rider** is designed to stimulate fun and balance development in children **from 3 years and up**. Made in the **shape of a motorcycle**, it is ideal for **public play areas**, schools and recreational spaces. The structure is composed of resistant and durable components: the **certified steel spring** ensures stable oscillation, while **seats and elements are in HDPE** resistant to atmospheric agents, perfect for prolonged outdoor use.

All **connectors are in stainless or galvanized steel**, with a **total absence of sharp edges** or dangerous gaps, ensuring maximum safety. The **screws are covered with polyamide caps**, while the **ground anchoring (recommended at 800 mm from the ground)** ensures optimal hold over time. The game is **certified according to the EN 1176 standard**, specific for play equipment installed in public spaces.

Choose the **h521\_47 spring rider** for a safe and fun play experience in your public spaces!

### Technical features:

- **Shape:** motorcycle
