FAQ:

1. Is the remote control included?

Yes, it is provided with the product.

2. What are the maximum overall dimensions?

The maximum overall dimensions are 2,070 x 1,502 mm.

3. Can it be mounted with a front drop?

No, this model only supports rear drop.

4. What are the advantages of the h920_01 screen?

The H920_01 screen stands out for its professional and durable construction, the aluminum housing with iron end caps for greater stability, and the integrated motor with RF control. These features ensure a better visual experience and ease of use, making it an excellent choice for conference rooms and large-scale events.

5. How does it ensure stability during projections?

The aluminum housing with iron end caps ensures a solid and stable structure, reducing vibrations and improving the visual

experience. This robust design is ideal for professional environments and large events.

Mini buying guide:

When choosing an **electric projection screen**, consider the size of the room and the intended use (conferences, events, etc.). Larger widths are ideal for large spaces.

Roll-up projection screens, electric projection screens, conference room projection screens, event projection screens, matte white screen.
