

## Multi-play composition for parks h575\_149

Playground tower with climbing platform, rocks, rope ladder and slide. Dimensions: 680 x 370 x h. 317 cm.

The **multi-play composition for parks** is designed to offer an exciting and dynamic play experience, perfect for stimulating the imagination of children. The beautiful decorative figures represent giraffes and elephants, evoking the wonderful savanna theme. This innovative play complex consists of **four towers** connected to each other via net passages, both horizontal and vertical, with **platforms** set at a height of 120 cm. The structure is made with durable 90 x 90 mm **aluminum posts**, featuring **rounded corners** to ensure maximum safety. The roofs and balustrades are made of 15 mm thick **sandwich HDPE**, while the **platforms** are made of **MDPE** with an **embossed** surface, ensuring high slip resistance. The tower includes an **MDPE climbing platform** with **polyethylene rocks**, a **rope ladder** and a **straight slide** in rotational polyethylene, with a height of 120 cm.

### Technical features:

- Dimensions: 680 x 370 x h. 317 cm
- Materials: aluminum, HDPE, MDPE and polyethylene
- Age of use: 3 - 12 years
- Safety area: 1030 x 646 cm
- Max drop height: 193 cm
- Impact-absorbing surface: 59.6 sqm
- Max number of users: 3 +
- With 4 towers
- Equipped with climbing platform, rocks, ladder and slide
- With rounded corners
