

Multi-play structure for playground h575_95

Multi-play composition with slide, climbing nets, sandbox.

Multi-play composition for playgrounds that promotes interaction between younger children. Recalling the shape of a **small ship**, it stimulates the imagination of young sailors, encouraging them to set sail together for new adventures. The complex is made up of two towers, with platforms placed at two different heights (h 90 cm and h 120 cm), connected to each other by a rope passage. To make the play experience more complete, the playground is enriched with the **Tic-Tac-Toe activity panel**, to stimulate the child's logical and intuitive abilities. The structure is made with 90x90 mm aluminum posts, with rounded corners (r. 10 mm), and powder-coated steel tubes (30x3 mm). It is equipped with **HDPE sandwich panels** (th. 15 mm), MDPE platforms with an embossed surface to ensure high slip resistance, and nets and ropes for climbing. The playground is provided with two **straight polyethylene slides** (h 90 cm and h 120 cm) and a **small sandbox**, located at the bow of the ship and decorated with two cute portholes. It is enriched with a Forex flag.

Technical features:

- Structure material: aluminum
- Recommended age: 3-12 years
- Overall dimensions: 445x774xh.301 cm
- Safety area: 845x1126 cm
- Max fall height: 234 cm
- Impact-absorbing surface: 68.4 sqm
- Max number of users: 3 +
- Straight steel slide
- Sandbox
