

Multi-purpose trolley with side panel h746_43

Steel parcel trolley with 50x50x4 mm mesh side panel. Capacity 300 kg, reinforced 1100x650 mm platform and wheels with roller bearings.

The **professional parcel trolley** with mesh side panel is a solution designed for the efficiency of manual load handling in logistical and industrial contexts. The structure integrates a protective side panel in tube and electro-welded mesh that acts as a containment barrier, preventing the accidental fall of goods and facilitating the management of stacked or unstable parcels. Thanks to the **reinforced platform** in high-thickness sheet metal and the sliding system on bearings, the trolley ensures operational stability and reduction of physical effort for the operator.

Technical features

- **Platform material:** Reinforced 20/10 thickness steel sheet
- **Side structure:** Steel tubular with metal mesh infill
- **Mesh size:** 50x50x4 mm
- **Wheel system:** 140 mm diameter with roller bearings (2 fixed and 2 swivel)
- **Maximum capacity:** 300 kg
- **Finish:** Epoxy powder coating in RAL 7038 Grey
- **External dimensions:** 1240 mm (L) x 660 mm (D) x 960 mm (H)
- **Platform useful dimensions:** 1100 mm (L) x 650 mm (W)
- **Handle:** Ergonomic handle integrated into the side panel structure
