

Multifunction hospital trolley with drawers h448_103

Multifunction trolley for hospitals with ABS top surface. Dimensions: W.65 x D.56 x H.94 cm. Available in different colors.

The hospital trolley for electromedical equipment is suitable for all healthcare facilities such as hospitals, private clinics, outpatient clinics and for all those who need a support for medical devices that must be moved from one environment to another.

The trolley features a **steel and aluminum structure with epoxy coating and an ABS top surface with a flange on three sides** where it is possible to place electromedical devices, such as ultrasound machines.

The trolley is also equipped with two **self-closing drawers** with telescopic slides where accessories and medical material can be stored.

The side handle and the 4 swivel wheels Ø100 allow the medical trolley to be moved without problems from one room to another.

It is possible to receive the trolley choosing between different finishes for the drawer and side details.
