

Multifunctional hospital trolley with shelf h448_104

Multifunctional hospital trolley with lower shelf and 2 drawers. Dimensions: W.65 x D.56 x H.94 cm. Available in various finishes.

The multifunctional hospital trolley is essential for medical and healthcare facilities where electromedical devices are frequently used. The product is therefore indispensable for emergency rooms, private clinics and outpatient clinics.

The trolley consists of a steel and aluminium structure with epoxy coating and an ABS top with flange on three sides where medical devices can be placed.

The trolley is also equipped with two **self-closing drawers** with telescopic slides where accessories and medical material can be stored.

The side handle and the 4 swivelling wheels Ø100 allow the medical trolley to be moved without problems from one room to another.

The lower ABS shelf finally allows for the transport of additional tools and sanitary materials

It is possible to receive the trolley by choosing from different finishes for the drawer and side details.
