

Multipurpose telescopic ladder h853_09

Professional 10-step aluminum telescopic ladder. Versatile structure with steel hinges, 1.59 m closed height and EN 131 compliance.

This **professional telescopic ladder** is designed to offer maximum versatility of use in technical contexts that require frequent movements and adaptability to different operating heights. Made of high-quality **aluminum**, the ladder combines structural lightness and mechanical resistance, solving storage and transport problems thanks to its compact design. The presence of **polypropylene** components and a steel hinge guarantees superior stability and long life, even under intense operational stress.

Technical features

- **Structural material:** high-resistance aluminum
- **Components:** step covers and support feet in polypropylene
- **Safety systems:** steel hinge with integrated release knob
- **Mechanisms:** step lock and hinge lock system for maximum stability
- **Configuration:** 10 steps
- **Dimensions:** height in closed position equal to 1.59 m
- **Regulatory compliance:** product compliant with European standard EN 131
