

Multipurpose telescopic ladder h858_25

Professional 4.1-meter telescopic ladder in anodized aluminum, 2x6 non-slip steps and EN 131 certified safe locking system. The **multipurpose telescopic ladder** is designed to meet the needs of the professional sector, offering an optimal balance between operational extension and logistical compactness. The structure is made of **anodized aluminum**, a treatment that prevents oxidation and ensures greater cleanliness during use, avoiding the release of dark residue on the operator's hands. The integrated locking mechanism ensures maximum structural stability, while the steps with ribbed surface increase grip in various working conditions.

Technical features

- **Material:** High quality anodized aluminum
- **Step configuration:** 2 x 6
- **Step type:** Non-slip with ribbed surface
- **Distance between rungs:** 28 cm
- **Safety system:** Fast and secure locking mechanism
- **Dimensions when closed:** 126 x 38 x 21 cm
- **Maximum extended height:** 4.1 meters
- **Compliance:** Manufactured according to EN 131 safety standards
