

Municipal waste trolley h951_06

Manual trolley for municipal cleaning with storage compartment and open shelf, fully equipped with tools and height-adjustable handle. Dimensions: W 90 x D 71 x H 103 cm.

The **municipal waste trolley h951_06** is a versatile and robust solution for professional cleaning needs in outdoor environments, such as city streets and parks. Designed to ensure comfort and practicality for operators, this trolley offers a capacity of **120 liters**, ideal for collecting large quantities of waste without frequent emptying. Its structure is made of **aluminum and steel**, combining lightness and strength for long-lasting and safe use.

Equipped with **two axles** and a **parking brake**, the trolley remains stable even during loading and unloading operations. The **front wheels** with a **310 mm diameter** ensure smooth movement on irregular surfaces and uneven roads. Standard equipment includes an **aluminum shovel**, **practical bag holders** that stretch the trash bags so they are easy to fill, a **litter picker for hygienic waste removal**, and a **street broom**, all with coordinated handles, making the trolley a complete kit for urban maintenance.

The **horizontal storage unit** allows for the transportation of up to **four handled tools**, with a **vertical pocket** for additional instruments. The **lockable storage compartment** protects tools and materials, while the **open shelf** provides immediate access to the most frequently used tools. The **height-adjustable handle** ensures a comfortable posture for operators of any height, reducing physical strain and improving ergonomics.

Make your cleaning operations more efficient and organized. Choose the **municipal waste trolley h951_06** for practical and professional waste management. Order today or contact us for a personalized quote!

Technical features:

- **Dimensions:** W 90 x D 71 x H 103 cm.
- **Weight:** 23 kg.
- **Capacity:** 120 liters.
