

Northmace h41436 dry iron for hotels

Elegance Northmace 1100W dry iron with a smooth-glide stainless steel soleplate that allows hotel guests to iron quickly and easily.

The **Northmace Elegance dry iron (model h41436)** is a high-end professional device, specifically designed to ensure quick, safe, and intuitive ironing in hotel rooms. With a power of **1100 W** and a **non-stick smooth-glide stainless steel soleplate**, this model allows guests in hotels and boutique resorts to handle their garments with extreme ease, without the complications related to water and limescale management. The “guest-friendly” design is reflected in immediate control buttons, solving the operational issue of ease of use for international users. Safety is guaranteed by an **integrated auto-off timer** that activates after just 30 seconds of inactivity in a horizontal position, while the 1.9-meter heavy-duty rigid rubber cable ensures optimal space management and long-term durability.
