

Northmace hotel ironing board h41420

Northmace ironing board with steel T-frame structure. Space-saving folding model with scorch-resistant cover and leg lock for hotels and resorts.

The **Northmace ironing station** is specifically designed for professional use in the hotel sector, where durability and practicality are essential requirements. Made with a robust **steel structure** and T-bar legs, this board guarantees long-lasting resistance even with frequent use. The height adjustment system allows the work surface to be adapted to the different needs of guests, ensuring an ergonomic and comfortable user experience directly in the room.

Safety and efficiency are ensured by the non-slip stabilising feet and the **metallised scorch-resistant board cover**, which not only protects the surface but also facilitates the iron's glide, optimising ironing times. To address the problem of space optimisation in accommodation facilities, the board is equipped with a **leg lock mechanism** that facilitates transport and allows the product to be stored compactly, minimising the footprint inside wardrobes or storage rooms.

Technical features

- **Brand:** Northmace
- **Material:** High-resistance pre-painted steel
- **Configuration:** T-bar legs for maximum stability
- **Adjustments:** Variable panel height
- **Ironing surface:** Metallised cover with scorch-resistant properties
- **Safety:** Leg lock mechanism for safe storage and transport
- **Ironing surface dimensions:** 905 x 350 mm
- **Total dimensions (closed):** 1100 x 405 mm
- **Equipment:** Version without iron
- **Colour:** Black and Silver
