

Notice board for urban furniture in Nordic pine h682_19

Single and double-sided notice board for urban furniture in pressure-treated Nordic pine, with a gabled roof and 9x9 cm upright posts equipped with galvanized foundations. Useful panel size 120x100 cm, height 230 cm.

The **notice board for urban furniture in Nordic pine** (model h682_19) is a floor-standing display structure specifically designed for setting up information points, tourist signage, institutional communications, and signposts in natural or urban contexts. Developed for **municipalities, park and nature reserve management bodies, municipal technical offices, landscapers, and green furniture installers**, this structure meets the need to position legible information modules integrated into the environment. The system solves the operational problem of **wood vulnerability to atmospheric agents, fungi, and bad weather, while ensuring totally safe use for the public and avoiding splinters or sharp edges**, thanks to the deep pressure-treatment process and the sanded finish with rounded edges. The notice board features a flexible single- and double-sided configuration, completed by a protective gabled roof and structural upright posts to be buried using the specific galvanized foundations included.

Technical characteristics

- **Display configuration:** modular notice board usable in both single and double-sided modes
- **Structural material:** Nordic pine wood
- **Finish and surface processing:** sanded and smoothed splinter-free, with all edges rounded for user safety
- **Protective wood treatment:** pressure-treated in an autoclave according to RAL 4 standards with chrome-free ecological salts
- **Upper cover features:** structured protective gabled roof
- **Vertical upright posts dimensions:** square section 9 x 9 cm
- **Ground anchoring system:** upright posts prepared for burial with galvanized foundations included
- **Assembly components and hardware:** galvanized screws included for assembly operations
- **Useful internal panel size:** 120 x 100 cm
- **Overall notice board height:** 230 cm (in addition to the depth for galvanized foundations)
