

Nursery school mat h999_32

Blue nursery school mat (130x100x1 cm) in polyethylene foam and PVC. Floor fixing with velcro, M2 fireproof, waterproof and antibacterial.

The **h999_32 nursery school mat** is a professional protective surface designed for play activities and motor development in early childhood. Specifically aimed at nursery school educators, kindergartens, and therapists, this support concretely solves the problem of safety and hygiene on the ground, offering an isolated and stable space thanks to the velcro fixing system integrated at the corners. Made with a 1 cm thick polyethylene foam core and a soft-touch PVC coating, it guarantees a comfortable environment for playing and crawling. Its absolute waterproofness and antibacterial treatment, combined with rigorous international certifications for fire resistance (M2 fireproof) and UV rays, make it a reliable and durable equipment for intensive use in all school environments.
