- **Robust and resistant:** Ideal for outdoor environments and intensive use
- **Stable:** High weight to prevent displacement and vandalism
- **Spacious:** Octagonal design ideal for groups and convivial activities

FAQ:

1. Is the set suitable for school environments?

Yes, thanks to its robust and safe structure, this set is ideal for schools, playgrounds, and other areas frequented by children and families.

2. Is it necessary to fix the set to the ground?

It is not strictly necessary thanks to the weight of **184 kg**.

3. Does it resist atmospheric agents?
Yes, recycled plastic is resistant to rain, sun, and does not deteriorate with temperature changes.

Mini buying guide:

When choosing a table and bench set for urban furniture, always consider **sustainable** materials such as recycled plastic, which offers resistance and durability over time. The octagonal shape is ideal for spaces intended for socialization, as it allows for more people to be accommodated uniformly. Ensure that the set is **robust and stable** to prevent vandalism and guarantee safety. Recycled plastic is particularly suitable because it requires no maintenance and resists atmospheric agents. This set is perfect for recreational areas, public parks, and outdoor spaces dedicated to the community.
