

Octagonal section grey cast iron bollard h682_18

Octagonal section grey cast iron bollard with spherical knob and 2 eyelets for chains, mm 150x150x1350h. Heavy 20 kg structure designed for ground anchoring.

The **grey cast iron octagonal section bollard** (model h682_18) is a heavy urban furniture item, specifically developed for the delimitation of pedestrian zones, the control of vehicle flows and the creation of modular physical barriers using chains. Designed for **municipalities, municipal technical offices, historical centers, landscapers and managers of public, commercial or corporate spaces**, this element combines high mechanical stability with a traditional geometric profile. The system resolves the operational problem of **illegal parking on sidewalks and unauthorized vehicle access in limited traffic zones (ZTL), effectively resisting mechanical impacts and tampering attempts** thanks to the structural properties of grey cast iron. The shaft stands out for its faceted octagonal section, completed at the top by an ornamental spherical knob and provided with two integrated lateral eyelets for the series connection of chains; the base of the item is structurally designed to guarantee a firm and permanent anchoring to the ground.

Technical characteristics

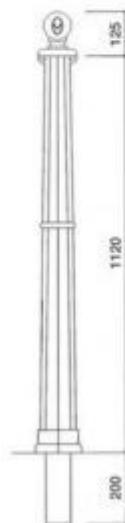

- **Geometric body configuration:** octagonal section safety bollard
- **Main construction material:** structural grey cast iron
- **Aesthetic and ornamental details:** faceted geometric shaft and spherical knob inserted at the top
- **Preparation for delimitation barriers:** 2 integrated eyelets for attaching chains
- **Overall geometric dimensions (WxDxH):** approx. 15 x 15 x 135 cm (mm 150 x 150 x 1350h)
- **Footprint area of the single element:** 1 m²
- **Base configuration:** structural base designed for ground anchoring
- **Product mass / structural weight:** 20 kg (Total weight 20 kg)

** Images are purely indicative*

- **Material** ghisa
- **reflective band** no
- **Diameter** 150.000000
- **fixing** da inghisare
- **Typology** Con anelli
- **Height in millimetres** 1350.000000
