

Office cabinet with 2 tambour doors h976_25

Metallic office cabinet with PVC tambour doors, mm 1000x450x2000h. DC01/FeP01 steel structure thickness 8/10, RAL 7035 grey with 4 movable shelves for hanging folders.

The **office cabinet with 2 tambour doors** (model h976_25 / 100 cm variant) represents a professional high-density space-saving furnishing solution, specifically designed for the filing and classification of documents in dynamic work environments. Developed for **operational offices, corporate archives, professional studios, banking institutions, and public bodies**, this piece of furniture perfectly meets the needs for optimizing transit spaces. The system solves the operational problem of the **frontal obstruction of hinged doors in corridors or small offices**, thanks to a mechanism with sliding tambour doors that disappear laterally inside the cabinet body. Made with a sturdy metallic structure in first-choice DC01/FeP01 UNI EN 10130 steel with a thickness of 8/10, the cabinet guarantees superior structural stability, integrating internal sides equipped with racks and structured movable shelves with lower predisposition for hanging folders.

Technical characteristics

- **Product name:** Unassembled tambour door cabinet
- **External overall dimensions (WxDxH):** 1000 x 450 x 2000 mm
- **Internal compartment useful dimensions (WxDxH):** 850 x 380 x 1900 mm
- **Total number of places/compartments:** 1
- **Number of compartments per column:** 1
- **Structure construction material:** first-choice DC01/FeP01 UNI EN 10130 steel
- **Steel sheet thickness:** 8/10 mm
- **Total structural weight:** 81 kg
- **Logistical volume:** 0.29 m³
- **Base configuration:** steel plinth base with a height of 60 mm
- **Body features:** formed by interlocking panels and fixing screws, including bottom, top, and back
- **Tambour housing:** internal panels arranged to form 2 compartments for the sliding and housing of the shutter
- **Side finish:** provided with racks for shelf positioning, with a frontal thickness of 40 mm and safety rounded edges
