

Office key display board h824_10

24-position key cabinet in aluminum and plexiglass, 29x37 cm. Structure with rounded corners and safety cylinder lock.

The **key cabinet** is a professional solution designed for the organization and secure storage of keys in work and hospitality contexts. The structure combines an **aluminum frame with rounded corners**, ideal for ensuring accident prevention safety in transit areas, and a **galvanized sheet metal** back which provides stability and mechanical resistance. The **transparent plexiglass** swing door allows for immediate visual monitoring of the contents, while protecting them from dust and unauthorized access thanks to the integrated cylinder lock.

Technical features

- Structure material: anodized aluminum
- Back: oxidation-resistant galvanized sheet metal
- Door: transparent plexiglass swing door with high visibility
- Closing system: safety cylinder lock
- Storage capacity: 24 positions for keys or sets
- Overall dimensions: 29 x 37 cm
- Safety: rounded corners to prevent accidental injuries
