

Operating room bowl stand h711_03

Professional double bowl stand in chromed steel and 18/8 stainless steel, height 82.5 cm. Structure on wheels for maximum mobility in surgical environments.

The h711_03 double bowl stand is a technical furniture piece specifically designed for integration into the operating blocks of clinics and hospitals. The double housing configuration allows for optimal management of liquids or instruments during surgical phases, while ensuring superior stability thanks to the five-spoke base. The combination of a chromed steel supporting structure and stainless steel basins ensures the necessary resistance to intensive sanitization cycles required by sterile environments.

Technical specifications

- **Total height:** 82.5 cm
- **Structure:** High-resistance chromed steel
- **Equipment:** 2 removable 18/8 stainless steel bowls
- **Capacity:** 6 liters per single bowl
- **Base:** 5-spoke configuration for anti-tipping prevention
- **Mobility:** Swivel wheels for smooth and silent movement
