

Operating room clog rack h740_18

Single-sided AISI 304 stainless steel rack for storing 18 pairs of clogs, equipped with removable supports and rubberized wheels with brakes.

The **h740_18** rack is a professional solution designed for the organization and storage of technical footwear in healthcare and sterile environments. Entirely made of **AISI 304 stainless steel**, it guarantees maximum hygiene and corrosion resistance, meeting the rigorous standards required within operating blocks. The single-sided structure optimizes space, allowing for the orderly storage of 18 pairs of clogs distributed over three mobile levels, facilitating tidying, retrieval, and sanitization operations.

Technical features

- **Structure material:** AISI 304 stainless steel square tube
- **Configuration:** Single-sided with 3 removable supports equipped with hooks
- **Load capacity:** 6 pairs per support (total capacity 18 pairs)
- **Dimensions:** W. 620 x D. 515 x h. 1396 mm
- **Hook center distance:** 320 mm for correct footwear spacing
- **Mobility:** 4 wheels with a diameter of 125 mm, 2 of which are equipped with a parking brake
- **Protection:** Integrated bumpers at the base for the protection of walls and furniture
- **Versatility:** Removable supports to facilitate maintenance operations
