

Operating room sink h601_75

Single-channel surgical sink with flex clinic lever mixer. 20 cm deep basin, 10 cm splashback. Dimensions: W 100 x D 50 x H 35 cm. Drain and pull-out spray included.

The **h601_75 operating room sink** is a professional surgical device designed to ensure the highest standards of hygiene in sterilization and pre-operative washing areas. This single-channel model is equipped with a **flex clinic lever mixer**, specifically designed for elbow operation, reducing the risk of cross-contamination. The structure features a **20 cm deep basin** to limit splashing and a 10 cm rear splashback to protect the wall. The sink is supplied complete with drain and **pull-out spray**, offering maximum flexibility during washing operations for medical personnel.
