

Operating table for veterinary clinics h930_38

Operating table for veterinary clinics with wheels equipped with brakes. Electrically adjustable height. W. 167 x D. 66 x H. 51-101 cm.

The **operating and therapeutic table for veterinary clinics** is designed to ensure maximum functionality and comfort during operations. The **electrical height adjustment**, activated via a practical **foot pedal switch**, allows the operator to quickly adapt the table to the desired position without interrupting procedures. The solid **steel structure** is coated with a scratch-resistant and chip-resistant powder paint, which ensures long life and resistance to wear. The **table top**, made of **stainless steel**, is equipped with **two drainage holes** to facilitate the management of liquids during surgeries. The **side handles** along the longer sides of the top offer practical support when moving the table. The presence of **rails** on the upper part allows the addition of accessories, making the table extremely versatile. The base is mounted on **four swivel wheels equipped with brakes**, which guarantee smooth mobility and the possibility of locking the table safely. The accessories included, such as the **IV pole**, the **mattress** and the **non-slip mat**, complete the equipment, offering full support for various operational needs.

Technical features:

- Dimensions: W. 167 x D. 66 x H. 51-101 cm
- Top dimensions: 160x65 cm
- Work surface dimensions: 154x59 cm
- Maximum load capacity: 150 kg
- Weight: 65 kg
- Electrical height adjustment via foot pedal switch
- 4 swivel wheels with brake
- Structure material: powder-coated steel with scratch-resistant and chip-resistant finish
- Stainless steel table top with 2 drainage holes
- Handles
- Rails for mounting accessories
- IV pole 119 cm
- Mattress
- Non-slip mat
