

Outdoor advertising totem h738_205

Outdoor advertising totem h738_205 with a curved line, height 2000 mm. Aluminium structure with metal skeleton and white sheet metal surfaces. Static certification included.

The **outdoor advertising totem h738_205** is a high-impact display support, characterized by a refined **curved line** and a structure designed to withstand external environmental stresses. Made with **aluminium profiles** and equipped with an **internal metal reinforcement skeleton**, this totem guarantees certified structural solidity, ideal for visual communication in open spaces. The display surfaces are made of **white pre-painted 10/10 sheet metal**, offering a neutral and resistant base for advertising messaging. The base is designed with specific holes for **ground fixing**, ensuring permanent stability, while the upper terminal is finished in dibond. It solves the problem of bidirectional visibility in outdoor contexts thanks to its imposing format and the included **static certification**.

Technical features

- **Structure material:** Aluminium profiles with internal metal reinforcement skeleton
- **Display surfaces:** White pre-painted 10/10 sheet metal
- **Upper terminal:** In Dibond
- **Structure height:** 2000 mm
- **Format:** 700 x 2000 mm
- **Visible area:** 660 x 2000 mm
- **Base dimensions:** 750 x 450 mm (thickness 6 mm)
- **Safety:** Perforated base for ground fixing (holes Ø 9 mm)

- **Certifications:** Static certification included
