

## Outdoor aluminum totem h738\_194

Single-sided or double-sided totem h191 cm in aluminum and semi-expanded PVC, with silver metal base and oval upright, ideal for indoor signage

The **h738\_194 totem** is a single or double-sided flag-style visual communication system, designed for **indoor** contexts that require elegance and stability. The structure consists of a **silver anodized aluminum oval section upright** and a rectangular powder-coated metal base, a configuration that solves the problem of stability in transit areas. The display panel is made of 8 mm thick **white semi-expanded PVC**, an optimal surface for personalization via direct UV printing. Thanks to its clean design and technical materials, this totem represents a professional solution for informative or promotional signage inside halls, conference centers, and offices.
