

Outdoor bench h140_505

Galvanized steel bench, anatomical and sturdy seat. Ideal for street furniture. Dimensions: L 200 x D 58 x H 55 cm. Weight: 65 kg.

The **H140_505 outdoor bench** is designed to offer comfort and durability in any urban context. Made with a sturdy **galvanized steel** structure, it is ideal for installation on **existing low walls** thanks to the supports equipped with holes for secure and stable fastening. The **anatomical seat** is composed of galvanized steel round tubes, with enlarged terminals for a functional and resistant design.

Each component is made with **laser technology**, which guarantees a high degree of precision and an impeccable finish. The **anti-corrosion treatment** includes washing, sandblasting, and coating with thermosetting powders, followed by high-temperature polymerization. This ensures exceptional protection against atmospheric agents, making the product ideal for use in exposed areas, including coastal environments.

The **seat and backrest** consist of **round steel tubes** which, thanks to their anatomical arrangement, offer superior comfort for users. The ergonomic design is studied to guarantee a stable and comfortable seat, while the enlarged terminals add strength and a distinctive aesthetic touch.

The bench is supplied in an **assembly kit**, complete with steel screws and bolts and detailed instructions for easy installation. The modular design allows for quick and safe assembly, suitable even for non-specialized personnel. The finish in RAL colors (9010 for the supports and 1015 for the seat) gives the product an elegant and modern appearance, perfectly integrated into any public or private environment.

Thanks to its anatomical structure and the quality of the materials, the **H140_505 street furniture bench** represents an ideal choice for those who wish to combine **comfort, design, and longevity** in a single piece of street furniture.

Elevate your urban space with a superior quality bench. Order the **H140_505 public space bench** now and receive a certified, sturdy product ready for installation! Contact us for personalized quotes on multiple supplies or for information on customizable colors.

- **Easy installation:** thanks to the included kit.
- **Ideal:** for coastal areas or areas subject to adverse weather conditions.
- **Stability:** ideal for existing low walls or parapets.

FAQ:

1. **Is the product suitable for outdoor use?**

Yes, thanks to the anti-corrosion treatments and galvanization, the bench is highly resistant to weathering and salt spray.

2. **Is it possible to customize the color?**

Yes, upon request, it is possible to choose customized RAL finishes.

3. **Is the bench stable on any type of low wall?**

Yes, provided the wall is stable, regular, and has a flat surface.

4. **What certifications does the product have?**

The bench is certified ISO 9001:2015 for quality and UNI EN ISO 3834-3:2021 for welding.

5. **Does the bench have a backrest?**

Yes, the bench is equipped with a backrest.

Mini buying guide:

To choose the bench best suited to your outdoor spaces, first of all, check the **dimensions and compatibility** with the existing low wall. Carefully measure height and width to ensure stable fastening. Consider the climatic conditions of the area: the H140_505 bench is designed to withstand weathering and corrosion, ideal even in coastal areas.

Choose colors that harmonize with the surrounding environment: the standard **RAL 9010 and RAL 1015** colors are elegant and versatile, but they can be customized upon request. If you need more units, request a quote for a cost-effective and customized solution. The bench is supplied in an **assembly kit**, so it is essential to have the necessary tools available for installation.
