

Outdoor bike rack for external spaces h337_40

Galvanized and powder-coated bike rack for outdoor spaces, made of steel with a robust and durable structure. Dimensions: W 200 x D 52 x H 100 cm.

The **outdoor bike rack H337_40** is the ideal solution for parking bicycles safely and orderly. Perfect for public areas, parks, schools, businesses and condominiums, this rack is designed to withstand the elements thanks to the **galvanization and powder coating** treatment, which guarantees long life and high resistance to corrosion.

The structure is built with **D. 4 cm steel tubular** and rails reinforced by **D.12 mm solid round bars**, ensuring great stability even in conditions of intense use. The height of **100 cm** allows bicycles to be parked easily and secured firmly to prevent theft or accidental tipping.

Easy to install, it comes with **galvanized screws** and a stable fixing system. Thanks to the functional and compact design, this rack integrates perfectly into any urban or private context, keeping the area organized and tidy.

Buy the **outdoor bike rack H337_40** now and ensure order and safety in bicycle parking. Contact us for more information or request a personalized quote!

- **Treatments:** Silver galvanization + Powder coating
- **Dimensions:** W 200 x D 52 x H 100 cm
- **Weight:** 60 kg
- **Accessories:** Galvanized screws
- **Spaces:** 5
- **Packaging:** Plastic material (nylon-bubble wrap)
- **Color:** Anthracite grey

User benefits:

- **Weather resistance:** Thanks to galvanization and powder coating.
- **Robustness and stability:** Solid steel structure for intensive use.
- **Easy to install:** Supplied with screws for quick assembly.
- **Functional design:** Fits perfectly into any outdoor environment.
- **Safety and practicality:** Ideal for secure bicycle parking.

FAQ:

1. **How many bicycles can this rack accommodate?**
The rack can accommodate 5 bicycles.
2. **Is it rust resistant?**
Yes, thanks to galvanization and powder coating, it is highly resistant to corrosion and weather elements.
3. **Is the mounting hardware included?**
Yes, the galvanized screw kit is provided for quick and easy installation.
4. **How much does this rack weigh?**
The rack weighs 60 kg.

5. What maintenance is required?

It does not require routine maintenance, unless it is exposed to particularly aggressive atmospheric conditions.

Mini buying guide:

When choosing an outdoor bike rack, it is important to take into consideration some fundamental characteristics to guarantee the safety and durability of the product.

First of all, **the material and treatment** of the structure are essential. A rack in galvanized and powder-coated steel offers optimal protection against rust and weather elements, extending its useful life.

The dimensions and capacity must be evaluated based on the number of bicycles planned to be accommodated and the space available for installation. This model can accommodate up to 5 bicycles and is perfect for public or private areas with a high flow of cyclists.

In addition, it is important to verify **the ease of installation** and the presence of accessories, such as screws and plugs for mounting. This product includes the necessary hardware, simplifying the fixing process.

Finally, the **design** is an element to consider: a compact and functional rack, like this model, guarantees order and safety, maintaining a discreet and modern aesthetic.

Bike rack, outdoor bike rack, galvanized steel bike rack, secure bike parking, weather-resistant bike rack, urban bike rack, painted steel bike rack, public bike rack.
