

Outdoor bike rack h729_31

Bicycle support with 2-bike capacity. Dimensions: about W 70 x D 16 x h 75 cm. Protection with recycled rubber rings.

The **H729_31 bike rack** is a practical and durable solution for those who wish to offer safe and organized bicycle parking in outdoor environments. Ideal for public spaces, apartment buildings, schools, companies, and bike paths, this rack can accommodate up to two bicycles stably and securely.

Made of **high-quality steel tube**, its structure is designed to withstand atmospheric agents and ensure long-term durability, thanks to the primer base finish and charcoal gray painting. In addition to robustness, the **rack** stands out for its attention to bicycle protection: the **two rings in recycled rubber** reduce the risk of scratches and damage to the frame paint, a detail that enhances care for users and their equipment.

The functional design of the **flat iron rings** allows for the use of various types of locks, from cables to U-models, for high versatility and security. The fixing base is equipped with a resistant **pre-drilled plate**, easy to anchor on surfaces such as concrete or asphalt, ensuring a stable and long-lasting installation.

The **compact dimensions** make this rack suitable for all types of spaces, optimizing organization without cluttering. In addition to its functionality, the modern and minimalist design integrates harmoniously into any context, whether urban or private, adding a touch of order and elegance to outdoor spaces.

Make your outdoor spaces safer and more organized with the **H729_31 bike rack**, a product that combines resistance, functionality, and attention to detail. Don't wait! **Order now** and discover the quality of a product designed to last over time. If you need larger quantities for public or private projects, **contact us for a personalized quote**: our team is ready to offer you tailor-made solutions and advantageous discounts for bulk orders.

Technical features:

- **Capacity:** 2 bicycles
- **Structure material:** Ø 50 mm steel tube with primer base and charcoal gray painting
- **Bike protection:** 2 recycled rubber rings + 2 flat iron rings (4 mm thickness)
- **Fixing plate dimensions:** 260 x 160 mm
- **Plate thickness:** 5 mm with 4 holes Ø 11 mm
- **Total dimensions:** about W 70 x D 16 x h 75 cm.
- **Rubber rings dimensions:** W 19 x D 6 x h 48 cm.

User benefits:

- **Bike protection:** Rubber rings prevent damage to the frame.
- **Security:** Compatibility with various types of locks (not included).
- **Resistance:** Durable steel structure with anti-corrosion painting.
- **Versatility:** Suitable for public and private outdoor spaces.

FAQ:

1. **How many bicycles can the rack accommodate?**

The rack is designed to comfortably accommodate two bicycles, ensuring stability and safety for both.

2. **Is the rack suitable for all types of bicycles?**

Yes, the rack is compatible with most bicycle models, including city bikes, mountain bikes, and e-bikes, thanks to the versatile design of the rings.

3. **How does it protect bicycles from scratches?**

The rack is equipped with recycled rubber rings, which wrap around the bicycle frame, protecting the paint from scratches and abrasions.

4. **Which locks can I use with this rack?**

The flat iron and rubber rings allow the use of different types of locks, including cable locks, U-locks, and chains (not included).

5. **Is the rack weather-resistant?**

Absolutely yes. The steel structure with anti-corrosion painting is designed to withstand rain, sun, and other adverse weather conditions, making it ideal for outdoor use.

6. **How is the rack installed?**

The rack is equipped with a solid fixing plate with four pre-drilled holes. Simply anchor it to the ground using plugs or screws suitable for the type of surface (not included).

7. **Does it need maintenance?**

The rack requires minimal maintenance. Periodic cleaning with water and neutral soap is sufficient to keep it in good aesthetic and functional condition.

8. **Is the rack easy to move?**

The rack is designed for fixed installation. If necessary, it can be removed and reinstalled, but its weight and fixing system make it stable and secure against theft attempts or unauthorized movement.

9. **Is it suitable for small spaces?**

Yes, thanks to its compact dimensions (W 70 x D 16 x h 75 cm), the rack is perfect even for environments with limited space, such as apartment courtyards or narrow parking lots.

Mini buying guide:

When choosing a bicycle rack, it is important to consider some aspects to ensure you make the most suitable choice for your needs. The first element to evaluate is the **material**: opting for a treated steel rack, like the H729_31 model, guarantees long-term durability and optimal resistance to atmospheric agents. The anti-corrosion painting present on this product represents a further advantage, especially if the rack is intended for exposed outdoor spaces.

Another key factor is **bicycle protection**. If you want an option that not only offers robust support but also protects the frame paint, it is fundamental to choose models equipped with soft materials or coatings, such as the recycled rubber rings on the rack. This small detail makes a big difference, especially for those who use valuable bikes.

Then think about the **number of bicycles** you want to accommodate and the space you have available. A compact rack, like the H729_31 model, is perfect for optimizing spaces, offering a practical solution without cluttering. If instead you need to manage a larger number of bicycles, it might be useful to consider larger models or purchasing multiple units to combine.

Finally, do not overlook the **aesthetic aspect** and the context of use. If the rack will be installed in a visible area, such as an apartment courtyard, a company entrance, or a public space, design plays an important role. A rack with a modern and clean look, like this one, integrates perfectly into elegant and urban contexts, adding order and professionalism to the environment.

Investing in a quality rack is not only a practical choice, but also a way to improve the user experience, encouraging the use of bicycles and contributing to a more sustainable lifestyle.

Bike rack, resistant outdoor bike rack, compact bike support, secure bike parking, charcoal gray steel rack, modern design bicycle rack, rack with recycled rubber protection, rack for public spaces, rack for apartment buildings, bike parking for companies.
