

Outdoor cast iron fountain h763_35

Outdoor cast iron fountain with black oxide finish, 1" button tap and integrated grid. Height: 80 cm. Weight: 86.4 kg. Ideal for parks.

The **outdoor cast iron fountain** is an urban furniture element designed to offer services, comfort and well-being in public contexts such as parks and waterfronts. This product solves the problem of collective water supply through a **durable and functional** structure, capable of integrating aesthetic value and practical daily use. Thanks to its solid construction, it improves the user experience in the urban environment, ensuring resistance to atmospheric agents and a long operational life in open space redevelopment projects.
