

Outdoor defibrillator cabinet h667_16

Defibrillator cabinet H567_31 in high-resistance material, 43x50.4x21.4 cm, IP55 temperature-controlled with quick push-button opening and alarm.

The **H567_31 defibrillator cabinet** represents an advanced professional solution for the protection and storage of **Automated External Defibrillators (AED)**. Designed to meet safety requirements in both indoor and outdoor contexts, this device solves the critical issues related to exposing medical equipment to extreme temperatures and atmospheric agents, ensuring that the AED is always operational and ready for use in the event of a cardiac emergency.

The structure integrates an active **temperature control** system that preserves the integrity of the electronic components, batteries, and defibrillator electrodes. Visibility is guaranteed in all environmental conditions thanks to a high visual impact design and a dedicated lighting system.

Technical features

- **Automatic opening:** Immediate access to the AED by pressing a dedicated button.
- **Dimensions:** 43 x 50.4 x 21.4 cm, optimized for wall-mounted space.
- **Ventilation and heating:** Active system for maintaining operability in a temperature range from -30°C to +50°C.
- **Internal lighting:** Integrated LEDs for locating the device in low visibility conditions.
- **IP55 protection grade:** Total dust resistance and protection from water splashes, suitable for outdoor environments.
- **Alarm function:** Integrated acoustic system for the prevention of theft and vandalism.
- **Universal compatibility:** Internal compartment sized to accommodate any defibrillator model on the market.
- **Configuration:** Specific for outdoor and fixed wall-mounted installation.
- **Recognizable design:** Standardized aesthetics for rapid identification during rescue operations.
