

Outdoor fountain h287_385

Urban furniture fountain in galvanized steel and concrete (65x50x90 cm). Includes push-button tap and anti-degradation basin for maximum durability.

The **H287_385 outdoor fountain** represents an advanced technical solution for urban furniture, specifically designed for high-traffic contexts such as parks, squares, school complexes, and sports facilities. The essential design is combined with a **multi-material construction** that guarantees high mechanical resistance and a long service life even in adverse climatic conditions, solving the critical issues related to wear and vandalism in public spaces.

Technical features

- **Supporting structure:** Vertical shaft in steel profile with a diameter of 150 mm.
- **Collection basin:** Made of vibrated reinforced concrete with a diameter of 50 cm and anti-degradation surface treatment.
- **Dispensing system:** Chrome-plated tap with push-button control for limiting water waste.
- **Metal protection:** Hot-dip galvanizing according to UNI EN ISO 1461 and subsequent thermosetting non-toxic polyester powder coating.
- **Overall dimensions:** L 65 x D 50 x H 90 cm.
- **Fixing type:** Prepared for stable anchoring at ground level.
- **Hydraulics:** Internal components included, connection works to the network excluded.
