

Outdoor fountain h744_30

Square metal fountain for public spaces. With drainage grate. Height: 100 cm.

Urban furniture fountain designed to add a touch of refinement and functionality to public spaces. Composed of a **robust metal body**, it offers a structure **resistant and durable over time**, capable of facing the most diverse environmental conditions without compromising its integrity or aesthetics. The **water drainage grate**, carefully integrated into the design, ensures efficient drainage, preventing water accumulation and keeping the surrounding area always dry and safe. The fountain not only serves as a refreshment point for citizens, but also contributes to improving the overall appearance of the urban environment. Its presence in parks, squares and city streets becomes a visual landmark, encouraging social interaction and offering an oasis of freshness and refreshment. The **versatile and modern design** fits perfectly into various architectural contexts, blending harmoniously with the surrounding landscape. Please note that the **taps are not included** with the fountain.

Technical Features:

- Height: 100 cm
- Grate length: 30 cm
- Metal fountain
- Tap not included
- Anchoring: flush with the ground
- Equipped with water drainage grate
