

Outdoor fountain in galvanized steel h521_25

Modern outdoor fountain in galvanized and painted steel (160x578x1010 mm) with timed tap and integrated fixing grid. This **outdoor fountain** combines a modern and minimalist design with a robust construction, designed to integrate into contemporary architectural projects and public spaces. The **square structure** is made of **galvanized steel**, treated with oven-baked polyester painting to ensure superior protection against atmospheric agents and maintain the refined black finish over time. The system is designed to combine formal aesthetics with operational functionality, solving water supply needs in

contexts that require high resistance and ease of maintenance.

Technical characteristics

- **Dimensions:** L. 160 x D. 578 x h. 1010 mm
- **Structure:** High-resistance galvanized steel square profile
- **Finish:** Specific oven-baked polyester painting for outdoors, black color
- **Drainage system:** Rectangular steel grid included
- **Installation:** Frame and fixing legs included for stable anchoring to the ground
- **Dispensing:** Chrome-plated tap with timed button for water flow optimization
