

## Outdoor fountain with ground basin h319\_61

Concrete urban furniture fountain with ground basin. Dimensions: W.380 x D.450 x h.1210 mm.

Discover the elegance of our **fountain for public spaces**, designed to enrich urban furniture with a touch of sophistication and functionality. Made of **high-quality worked concrete**, this fountain represents an ideal choice for outdoor environments, guaranteeing a perfect combination of aesthetics and durability. The fountain is built with **worked concrete**, a material known for its resistance to weathering and daily mechanical stress. This ensures not only a long life, but also an always impeccable appearance. The **different finishes available** offer a **wide range of options** to adapt the fountain's design to the specific context. Designed with a **functional design**, the fountain can be easily **installed either by resting it directly on the ground or by anchoring it** via base adhesive, for greater stability. This versatility makes it suitable for a variety of contexts, from city parks to pedestrian areas. The **edges** of the fountain are finely **sanded and rounded**, ensuring safety and comfort for users. Careful workmanship eliminates the risk of accidents and gives the fountain a refined and welcoming appearance. Note that **taps are not included** with the fountain, allowing you to choose and install the type of tap best suited to your specific needs. It is not just a decorative element, but a truly practical and functional addition to any urban environment. With its robustness and customization options, our fountain improves the attractiveness and practicality of public spaces, offering a refreshment and beauty point. Ideal for squares, parks and avenues, it integrates harmoniously into any urban furniture project, helping to create more livable and inviting spaces.
