

Outdoor informative panel h738_130

Signage post for corporate outdoor areas, consisting of a pair of uprights and 4 slats. Total dimensions: W 1640 x D 45 x H 2000 mm.

The **h738_130 modular outdoor signage post** is the ideal solution for ensuring clear and customizable signage in busy outdoor environments, such as companies, hospitals, supermarkets, museums and other public spaces. This robust and modular structure is designed to withstand the elements thanks to the use of high-quality materials, including **anodized aluminum** and **painted steel**. The **anodized aluminum uprights** feature grooves for inserting the extruded aluminum **slats**, which can be customized on both sides, making them ideal for directional or informative signaling.

The post can be installed with **painted steel bases** or, alternatively, fixed via **ground-embedment brackets**, offering maximum flexibility in terms of installation. The 2 cm thick slats slide easily into the uprights using pins fixed with screws, allowing for a quick and practical configuration based on the customer's specific needs. The **gothic grey** finish adds an elegant and modern touch, perfectly adapting to various architectural contexts.

With total dimensions of **W 1640 x D 45 x H 2000 mm**, this post can accommodate up to **4 slats** measuring **W 1500 x H 300 x D 20 mm**, allowing for clear signaling even in large environments. The modular configuration allows for the addition or removal of slats as needed, making this post particularly suitable for places where signage must be updated or modified frequently. The **ABS end caps** at the top of the uprights complete the structure, ensuring an elegant finish protected from external agents.

Optimize the signage of your outdoor spaces with the **h738_130 modular signage post**. Customize the slats and choose the ideal configuration for your needs. **Request a personalized quote now** and discover how to improve the organization of your spaces with durable, high-quality signage.

Technical features:

- **Uprights:** in anodized aluminum with grooves for inserting the slats and ABS end caps.
- **Bases:** in painted steel, or ground-embedment brackets for greater stability.
- **Slats:** extruded aluminum, customizable on both sides, with a thickness of 2 cm.
- **Total dimensions:** W 1640 x D 45 x H 2000 mm.
- **Upright dimensions:** W 70 x D 45 x H 2000 mm.
- **Slat dimensions:** W 1500 x D 20 x H 300 mm.
- **Finish:** gothic grey.
- **Installation:** with bases or by ground embedment with brackets.

User benefits:

- **Full customization:** ability to add or remove slats according to needs.
- **Weather resistance:** high-quality materials designed to last over time in outdoor environments.
- **Installation flexibility:** ground fixing or embedment options, based on terrain characteristics.
- **Modern and functional design:** elegant aesthetics, perfect for professional and public environments.

FAQ:

1. **Are the slats customizable?**

Yes, the slats can be customized on both sides to provide clear and visible signaling.

2. **How is the post installed?**

It can be fixed with painted steel bases or embedded in the ground using special brackets for greater stability.

3. **Is it possible to increase or decrease the number of slats?**

Yes, the modular system allows you to add or remove slats based on your needs.

4. **Is the post weather-resistant?**

Yes, thanks to resistant materials such as anodized aluminum and painted steel, the post is designed to last a long time in outdoor environments.

5. **Can the slats be easily replaced?**

Yes, the slats are slid into the uprights, which makes their replacement quick and simple.

Mini buying guide:

When purchasing a **modular outdoor signage post**, it is important to consider the context of use and the number of indications you wish to display. If you need flexible signage, where information may change frequently, choose a modular configuration that allows for the addition or removal of slats as needed. Furthermore, if the post is to be installed in an area exposed to wind or with unstable ground, consider the ground-embedment option with brackets to ensure greater stability and safety.

The **customization of the slats** is another crucial aspect: opt for surfaces that can be easily modified, so that you can update the visible information without having to replace the entire post. In environments such as hospitals or shopping centers, where clarity of signage is essential, a highly visible and organized design is fundamental for guiding visitors in the best possible way. This **h738_130** post is excellent for any outdoor environment.
