

Outdoor Nordic pine wood litter bin h287_397

Outdoor litter bin in galvanized steel and Nordic pine, 34x51x100 cm. Integrated design for green areas with a quick-release emptying system.

The **h287_397** outdoor litter bin is an urban furniture solution designed to combine the natural aesthetics of wood with the structural resistance of treated metals. Developed for waste management in high-traffic contexts such as **green areas, public parks, and cycle-pedestrian paths**, this container responds to the need for operational durability in environments exposed to atmospheric agents, while ensuring a low visual impact on the landscape.

Technical features

- **Bin structure:** 10/10 thick galvanized steel sheet for an optimal balance between weight and strength.
- **Bottom and lid:** 15/10 thick pressed sheet metal disc, designed to increase overall structural rigidity.
- **External cladding:** pressure-treated Nordic pine slats (85 x 20 mm section) to prevent biological deterioration.
- **Support post:** Ø 80 x 2 mm galvanized steel round tube equipped with a hemispherical head cover.
- **Laser components:** protective roof and fixing plate shaped using precision laser technology.
- **Emptying system:** quick-release opening mechanism operated via the included Allen key.
- **Bag management:** internal bag holder ring supplied as standard to stabilize the bag and simplify maintenance.
- **Hardware:** bolts and screws entirely made of anti-corrosion STAINLESS steel.
- **Metal treatment:** non-toxic powder coating with polymerization process in an oven at 180/200°C.
- **Dimensions and capacity:** overall dimensions 34 x 51 x H 100 cm; volumetric capacity of approximately 32 liters.
- **Anchoring:** base prepared for stable floor-level fixing.
