

Outdoor pine wood litter bin h287_396

Professional outdoor litter bin in galvanized steel and Nordic pine, 50x50x85 cm. Capacity 120L, weather-resistant structure. The **outdoor litter bin h287_396** is a professional furniture component designed for efficient waste management in public contexts and high-traffic areas. The structure integrates the mechanical stability of **steel** with the biological resistance of treated **Nordic pine wood**, offering a durable solution against atmospheric stress and daily wear. The advanced finishing process resolves issues related to corrosion and wood degradation in exposed outdoor environments.

Technical specifications

- **Overall dimensions:** 50 x 50 x H 85 cm
- **Volumetric capacity:** approximately 120 liters
- **Supporting structure:** Galvanized steel tubes with non-toxic powder coating
- **External cladding:** Nordic pine slats (90 x 20 mm) treated with non-toxic salts
- **Metal finish:** Steam degreasing and electrostatic painting with oven polymerization at 200°C
- **Hardware:** Galvanized bolts complying with UNI 3740 regulations
- **Fixing system:** Prepared for stable ground-level anchoring
- **Wood treatment:** Autoclave impregnation specific for outdoor use
