

## Outdoor planter made of recycled plastic h924\_39

100% recycled plastic planter for outdoor use, ideal for urban furniture. Dimensions: W 150 x D 40 x H 49 cm. Weight: 70 kg.

The **H924\_39 planter** is the ideal choice for those looking for an urban furniture element that combines **sustainability, resistance, and functional design**. Made of **100% recycled plastic**, it is designed for use in **high-traffic outdoor environments**, such as **parks, sidewalks, schools, bike paths, shopping centers, and residential areas**.

Thanks to the eco-friendly material with which it is produced, this planter guarantees **durability over time and no need for maintenance**, unlike wood or metal. It is **resistant to weather agents**, UV rays, frost, and impacts, making it perfect for permanent installations in urban or landscape contexts.

With a **length of 150 cm**, it offers a large capacity for planting **flowers, ornamental plants, or shrubs**, also becoming a valid **natural partitioning element**. The **weight of 70 kg** ensures **absolute stability**, avoiding unauthorized or accidental movements.

Give value to your outdoor spaces with a sustainable and durable product. Contact us now for more information on the **H924\_39 planter** or for a personalized proposal for public or private supplies.
