

Outdoor polyethylene fountain h465_26

Outdoor fountain in UV-resistant HDPE polyethylene, 500x460x1000 mm. Double dispensing at different heights for ergonomic and inclusive use.

This **outdoor fountain** represents a functional and durable solution for furnishing play areas and urban contexts frequented by different age groups. Made entirely of **high-density polyethylene (HDPE)**, the structure is designed to guarantee high mechanical and chemical resistance. The integrated anti-UV treatment preserves the color and structural integrity of the material even in case of prolonged exposure to solar radiation and the most aggressive atmospheric agents. The **double-height faucet** configuration is designed to provide easy access to water for both adults and children, promoting the autonomy of the youngest in total safety.

Technical features

- **Material:** high-resistance high-density polyethylene (HDPE)
- **Dimensions:** W. 500 x D. 460 x h. 1000 mm
- **Treatment:** UV protection for permanent outdoor exposure
- **Dispensing:** 2 faucets arranged at different heights
- **Components:** anti-corrosion stainless steel fixing screws
- **Customization:** available in different color variants
