

Outdoor stainless steel fountain h516_08

Outdoor stainless steel fountain, Ø 330 x H 845 mm, with nozzle and semicircular collection bowl for urban furniture and gardens.

This **outdoor stainless steel fountain** represents a functional and durable solution for furnishing public spaces and green areas. The essential cylindrical design integrates discreetly into parks, squares, and condominium gardens, solving the need for corrosion-resistant and easy-to-maintain water supply points. The structure is designed to effectively manage water flow thanks to the presence of an integrated bowl that prevents uncontrolled dispersion onto the ground.
