

Outdoor terracotta fountain h16867

Hand-crafted terracotta column garden fountain, dimensions 40x34x103 cm, equipped with a tap and resistant to thermal fluctuations.

This **garden fountain** in terracotta represents an outdoor furnishing solution that combines artisanal aesthetics with operational functionality. Designed to withstand environmental stress, the structure utilizes high-quality clay properties to ensure optimal water point management in both public and private outdoor contexts. Handcrafting and the column design allow for harmonic integration into historical gardens, parks, and terraces, solving the need for a durable and decorative water dispensing element.

Technical features
