

Outdoor wall-mounted belt reel H972_110

20 m retractable belt with panic brake. Ideal for outdoor use. Belt width: 5 cm.

The **outdoor wall-mounted belt reel H972_110** is a professional device designed to **delimit or restrict access to certain areas** in outdoor contexts such as **construction sites, parking lots, temporary access points, industrial areas, public facilities, or events**. Thanks to its **length of 20 meters** and a **belt width of 5 cm**, this tool allows for **wide coverage** with high visibility, guaranteed by the **black/yellow or white/red safety colors**.

Made of **painted steel** for the structure and **high-resistance ABS** for the casing, it is designed to withstand **weathering agents** and prolonged outdoor use. The system is equipped with **panic technology**: in case of emergency, the belt releases automatically so as not to obstruct passage, thus offering an **advanced safety level**.

The **adjustable head** allows for **customization of the installation**, adapting to the direction of the barrier to be created. The product is supplied **complete with receiver and wall-mounting kit**, making installation **immediate and without the need for additional accessories**.

Perfect for public bodies, facility management companies, construction firms, event organizers, hotels, airports, and **urban furniture** contexts, this reel is a **safe investment** for the efficient management of flows and sensitive areas.

Buy the **H972_110 wall-mounted reel** now or contact us to receive a personalized quote for multiple supplies!

- **Adapts:** to multiple needs thanks to the adjustable head.

FAQ:

1. **Can the product also be used indoors?**
Yes, although it is designed for outdoors, it can be installed in indoor environments.
2. **What happens in case of emergency?**
The belt is equipped with a panic system that releases it automatically so as not to obstruct passage.
3. **Is it necessary to purchase accessories separately for installation?**
No, the product already includes a receiver and a complete mounting kit.

4. **Is it available in more colors?**

Yes, in two combinations: black/yellow and white/red, both high visibility.

5. **Is the product already assembled or does it require assembly?**

The product arrives ready for wall mounting, with instructions and components included.

Mini buying guide:

If you are looking for a system to delimit outdoor areas in a **safe, visible, and resistant** way, a wall-mounted reel like the H972_110 model is the ideal choice.

Before purchasing, evaluate the **required belt length**, the **resistance of the materials** to weathering agents, the presence of **safety functions such as the panic system**, and the **ease of installation**.

This type of product is perfect for temporary or prolonged use, in contexts where it is fundamental to manage access or signal dangers clearly and effectively.
